

Exposure to Neighborhood Poverty by Race/Ethnicity and Income

YEAR: 1999; RACE/ETHNICITY: ALL; INCOME: POOR; REGION: LARGEST 4 MSAS

Definition: This indicator provides the poverty rate for the average neighborhood in which each racial group lives, for households of different income groups. For instance, if the value is 10% for affluent blacks, this statistic is interpreted as "The average affluent black household in this metro area lives in a neighborhood where 10% of the population is in poverty."

Notes: Household income categories are defined as "poor" (income below \$30,000 in 1999), "affluent" (income more than \$60,000 in 1999), and "middle income" (those falling in between). Poverty status as of 1999. Excludes metro areas with less than 5,000 population of the specified racial/ethnic group.
